CAIIB – GENERAL INFORMATION

Consists of 3 papers :

#### I. Compulsory Paper

- 1. Advanced Bank Management
- 2. Bank Financial Management

#### II. Elective Papers (Candidates to choose any one of their Choice)

- 1. Corporate Banking
- 2. Rural Banking
- 3. International Banking
- 4. Retail Banking
- 5. Co-operative Banking
- 6. Financial Advising
- 7. Human Resources Management
- 8. Information Technology
- 9. Risk Management
- 10. Central Banking
- 11. Treasury Management
- > Only existing employees of banks and cleared JAIIB can appear for CAIIB Exam.
- CAIIB exams are conducted in on-line mode only.
- The examination will be conducted normally twice a year in May / June and November / December on Sundays.
- The duration of the examination will be of 2 hours.
- Examination Pattern : (i) Question Paper will contain 100 objective type multiple choice questions for 100 marks including questions based on case studies. The Institute may however vary the number of questions to be asked for a subject. Generally 60-65% theory based and 35-40% case study / problem solving/Analytical /Logical exposition. There is no negative marking for wrong answers.
- Passing Criteria Minimum 150 in total and minimum 45 in each subject in any single attempt (not required to be the 1st attempt) is considered as pass. Else 50 in each subject. Passed subject gets carried forward to 4 continuous attempts (whether you appear for the exam or not) from the 1st attempt. If not passed in 4 continuous attempts, you need to appear in all 3 papers.
  - First Class : 60% or more marks in aggregate and pass in all the subjects in the FIRST PHYSICAL ATTEMPT.
  - First Class with Distinction : 70% or more marks in aggregate and 60% or more marks in each subject in the FIRST PHYSICAL ATTEMPT.
  - Candidates who have been granted exemption in the subject/s will be given "Pass Class" only.

- Cut-off Date of Guidelines /Important Developments for Examinations The Institute has a practice of asking some questions in each exam about the recent developments/ guidelines issued by the regulator(s) in order to test if the candidates keep themselves abreast of the current developments. But, there could be changes in the developments / guidelines from the date the question papers are prepared and the dates of the actual examinations. In order to address these issues effectively, it has been decided that:
  - In respect of the exams to be conducted by the Institute for the Period from February 2019 to July 2019, instructions/guidelines issued by the regulator(s) and important developments in banking and finance up to 31st December, 2018 will only be considered for the purpose of inclusion in the question papers.
  - In respect of the exams to be conducted by the Institute for the period from August 2019 to January 2020, instructions/guidelines issued by the regulator(s) and important developments in banking and finance up to 30th June, 2019 will only be considered for the purpose of inclusion in the question papers.

#### Exam Fees

#### JAIIB

First attempt fee - 2,400\* Second attempt fee - 1,000\* Third attempt fee - 1,000\* Fourth attempt fee - 1,000\*

#### DBF

First attempt fee - 3,200\* Second attempt fee - 1,000\* Third attempt fee - 1,000\* Fourth attempt fee - 1,000\*

#### CAIIB

First attempt fee - 2,700\* Second attempt fee - 1,000\* Third attempt fee - 1,000\* Fourth attempt fee - 1,000\*

\* Plus convenience charges and Taxes as applicable

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442 3

#### SYLLABUS

The details of the prescribed syllabus which is indicative are furnished below. However, keeping in view the professional nature of examinations, all matters falling within the realm of the subject concerned will have to be studied by the candidate as questions can be asked on all relevant matters under the subject. Candidates should particularly prepare themselves for answering questions that may be asked on the latest developments taking place under the various subject/s although those topics may not have been specifically included in the syllabus. Any alterations made will be notified from time to time. Further, questions based on current developments in banking and finance may be asked.

Candidates are advised to refer to financial news papers / periodicals more particularly "IIBF VISION" and "BANK QUEST" published by IIBF.

#### **MODULE - A: Introduction**

History and definition, role within the bank operations, Applicability of retailing concepts distinction between Retail and Corporate / Wholesale Banking

#### **MODULE - B : Retail Products**

Retail Products Overview - Customer requirements, Products development process, Liabilities and Assets Products / Description of Liability products, Description of Asset Products, Approval process for retail loans, Credit scoring.

#### Important Asset Products -

Home Loans - Eligibility, Purpose, Amounts, Margin, Security, Disbursement, Moratorium, Prepayment issues, Repayments / Collection.

Auto / Vehicle Loans - Eligibility, Purpose, Amounts, Margin, Security, Disbursement, Moratorium, Prepayment issues, Repayments / Collection.

Personal Loans Eligibility, Purpose, Amounts, Security, Disbursement, Moratorium, Prepayment issues, Repayments / Collection.

Educational Loans Eligibility, Purpose, Amounts, Security, Disbursement, Moratorium, Prepayment issues, Repayments.

Credit / Debit Cards - Credit Vs Debit Cards, Eligibility, Purpose, Amounts, Margin, Security, Process of using the cards, Billing Cycle, Credit Points.

Other Products / Remittances / Funds Transfer

### **Retail Banking**

Bharat QR - A QR code consists of black squares arranged in a square grid on a white background, which can be read by an imaging device such as a camera. QR contains information about the item to which it is attached.

Answer the following questions regarding Bharat QR.

1. Bharat QR is ..... Mobile payment solution

a. P2P (Person to Person)

b. P2M (Person to Merchant)

c. M2P (Merchant to Person)

d. M2M (Merchant to Merchant)

2. Bharat QR is mutually derived among ..... payment networks. (i) NPCI, (ii) Visa, (iii) Mastercard

a. Only (i) and (ii)

b. Only (i) and (iii)

c. Only (ii) and (iii)

d. (i), (ii) and (iii)

3. What are the charges for using Bharat QR?

a. No additional charges for making transaction through Bharat QR

b. Depends on the Bank

c. Depends on the App

d. Depends upon the transaction amount

4. Can multiple bank cards be linked on same App?

a. No. Multiple cards can't be linked in a single app

b. Yes. Multiple cards of multiple banks can be linked in a single app

c. Yes. Multiple cards of the same bank can be linked in a single app

d. None of the above

5. First factor of 2FA for Bharat QR is MPIN for the mobile application login. Second factor is taken as ..... (i) MPIN, (ii) OTP, (iii) ATM pin

a. Only (i) or (ii) b. Only (i) or (iii)

c. Only (ii) or (iii)

d. (i) or (ii) or (iii)

murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

.....

6. What is the Daily transaction limit?

a. Rs. 10000

b. Rs. 20000

c. Rs. 50000

d. Set at Bank's end

7. How many Bharat QR transactions can be done in a day?

a. 25

b. There is no limit on number of transactions

c. There is no limit on number of transactions but subject to daily transaction amount limits on your Debit/Credit Cards

d. Set at Bank's end

Answers :

1-b, 2-d, 3-a, 4-c, 5-d, 6-d, 7-c

.....

An individual has recently purchased a house worth Rs. 40 lakh for self-occupation by availing housing loan of Rs. 28 lakh at 9.25% p.a. rate of interest. The tenure of loan is 18 years. He has Rs. 12 lakh financial assets at present invested at 9% p.a. He is expected to save annually Rs. 2 lakh which he invests on a quarterly basis beginning a quarter from now in an instrument which is expected to provide return of 9% p.a.

1. What will be the EMI on housing loan?

a. 25669

b. 26659

c. 26969

d. 29669

2. What will be the Outstanding in his housing loan after five years?

a. 21,14,624

b. 24,14,624

c. 24,41,624

d. 24,44,624

3. What will be the value of his Financial assets after five years?

a. 14,68,349

b. 16,48,349

.....

A businessman sold Rs. 85 lakh value of unlisted securities on 20th December 2016. These shares were acquired in April 2012 for Rs. 20 lakh. He invested Rs. 40 lakh from these proceeds in February 2017 in his first residential house to avail benefit under Section 54F of the Income-tax Act, 1961.

Cost inflation index for FY 2012-13 : 852 , 2016-17 : 1125.

1. What is the Indexed cost of acquisition in the year of sale?

a. 20,40,845

b. 20,46,845

c. 26,40,845

d. 26,46,845

2. What is the Long Term Capital Gains?

a. 58,58,155

b. 58,59,155

c. 59,58,155

d. 59,59,155

3. What is the Ratio of cost of new asset to net consideration?

a. 0.4706

b. 0.6706

c. 0.7046

d. 0.9706

4. What is the Exemption eligible under Section 54F?

a. 25,57,249

b. 25,75,249

c. 27,57,249

d. 27,75,249

5. What approximate amount of bonds specified under Section 54EC should he purchase and by what date so as to make his capital gains liability almost 'Nil' towards these transactions?

a. 30,12,000 and 19th June 2017 b. 30,20,000 and 19th December 2017

c. 31,02,000 and 19th June 2017

d. 31,20,000 and 19th December 2017

JAIIB CAIIB STUDY MATERIALS / CAIIB DISCUSSION **Facebook Groups** -**BANK PROMOTION EXAMS / ONLY FOR BANKERS** murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442 Solution : 1 - c Cost of acquisition of unlisted shares : 2012-13 = 20,00,000 Indexed cost of acquisition in the year of sale = 26,40,845 (2000000\*1125/852) 2 - b Sale proceeds : December 2016 = 85,00,000 Cost of acquisition of unlisted shares : 2012-13 = 20,00,000 Indexed cost of acquisition in the year of sale = 26,40,845 (2000000\*1125/852) Long Term Capital Gains = 58,59,155 (85,00,000-26,40,845) 3 - a Cost of new asset: a residential house = 40,00,000

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in

Sale proceeds : December 2016 = 85,00,000 Ratio of cost of new asset to net consideration = 0.4706 (40,00,000/85,00,000)

#### 4 - c

Long Term Capital Gains = 58,59,155 (85,00,000-26,40,845) Ratio of cost of new asset to net consideration = 0.4706 (40,00,000/85,00,000) Exemption eligible under Section 54F = 27,57,249 (58,59,155\*0.4706)

#### 5 - c

Capital Gains chargeable to tax = 31,01,906 (58,59,155-27,57,249) Approximate amount to be invested u/s 54EC bonds = 31,02,000 Date by which Sec 54EC bonds to be invested = 19th June 2017 (Within 6 months from sale)

Mrs. A whose date of birth is 30th March 1956 has a total salary income of Rs. 9,78,000 for the previous year 2016-17. She has income from other sources of Rs. 18,142 from her savings bank account. Her only investments are contributions to Recognised Provident Fund account which are 12% of her basic salary of 40,000 per month.

1. What will be the total eligible deductions for AY 2017-18?

- a. 10000
- b. 57600
- c. 62600
- d. 67600

Facebook Groups	<ul> <li>www.bankpromotionexams.com, www.onlyforbankers.in</li> <li>JAIIB CAIIB STUDY MATERIALS / CAIIB DISCUSSION BANK PROMOTION EXAMS / ONLY FOR BANKERS</li> <li>.com, admin@jaiibcaiibmocktest.com, 09994452442</li> </ul>
2. What will be her Taxable Salary fo	r AY 2017-18?
a. 978000	
b. 928542	
c. 996142	
d. 999542	
3. What will be her tax liability for AY	2017-18?
a. 85708	
b. 105708	
c. 108880	
d. 113708	
Solution:	
1 - d	
Deductions eligible:	
Interest up to Rs. 10,000 on savings b	oank (u/s 80TTA) = 10,000
Basic salary = 40,000	
	tions (cum. limit Rs. 1.5 lakh) = 57,600 (40000*12%*12)
Total deductions eligible = 10000+57	600
= 67600	
2 - c	
Income from Salary = 9,78,000	
Interest from Savings bank account =	= 18,142
Total income = 9,96,142 (978000+18	142)
Taxable Salary = 996142-67600	
= 9,28,542	
3 - c	
Up to Rs. 3,00,000 : Nil (Senior citize)	n) = 0
· ·	Rs. 3 lakh = 20,000 ((500000-300000)*10%)
•	of Rs. 5 lakh = 85,708 ((928542-500000)*20%)
Education Cess(es) = 3,172 ((25000+8	
Total Tax = 20000+85708+3172	
= 1,08,880

5. Central assistance at what rate per house for EWS category will be provided under the Affordable Housing in Beneficiary-led individual house construction or enhancement

a. Rs. 1 lakh b. Rs. 1.5 lakhs c. Rs. 2.3 lakhs d. Rs. 2.7 lakhs

Answers :

1. a - Rs. 1 lakh 2. b - 6.5 percent 3. c - Rs.2.3 lakhs 4. b - Rs.1.5 lakhs 5. b - Rs.1.5 lakhs

.....

What will be the capitalized value of a property purchased for Rs. 8,00,000 for income @ 10% rate of interest and redemption of capital @ 5% rate of interest for a period of 25 years?

a. 6161000 b. 6166000 c. 6616000 d. 6661000

Ans - c

Solution :

In actual practice, separate provision for sinking fund is not done but the capitalized value is obtained by referring to dual rate Valuation Tables to determine the multiplying factor (YP) based on income for a specified period (life of building) at particular interest rate and redemption of capital at another rate of interest.

Thus the YP or present value of Re 1 per annum for income @ 10% rate of interest and redemption of capital @ 5% rate of interest for a period of 25 years is 8.27 as per the tables (see Appendix). In other words, if a property is purchased for Rs. 8,00,000, its capitalized value will be 8.27 x 8,00,000 = 66,16,000.

Bharat Interface for Money (BHIM)

BHIM is a UPI based payment interface which allows real time fund transfer using a single identity like your mobile number or name.

Answer the following questions regarding BHIM.

1. Which one is not correct regarding money sent to a wrong user?

- a. Matter can be referred to NCPI
- b. A successful transaction cannot be reversed
- c. You have to try and raise a collect request and hope that the user will return the same

d. There is no guarantee that your amount will be reversed

2. What is correct in respect of BHIM? (i) You can't use BHIM outside India, (ii) You can use BHIM outside India to send and collect money for your local accounts, (iii) NRI/NRE accounts cannot be used for the same.

a. Only (i) and (ii)

b. Only (i) and (iii)

c. Only (ii) and (iii)

d. (i), (ii) and (iii)

3. What are the methods available on BHIM for sending Money? (i) VPA/Mobile No (Registered on UPI), (ii) Aadhaar Number (Should be linked to a bank account), (iii) Account Number and IFS code

a. Only (i) and (ii)

b. Only (i) and (iii)

c. Only (ii) and (iii)

d. (i), (ii) and (iii)

4. What are the charges to use BHIM?

a. Depends upon the transaction limit

b. Depends on the Bank

c. Depends on the App

d. NPCI does not charge any user for transacting on BHIM

.....

Mr X has been enjoying a credit card from ABC Bank. The bank has fixed a spending limit of Rs. 200000 lac on his card. During July 2016, he made purchase of Rs. 150000 and paid on due date (10 Aug 2016) Rs. 120000 being a part of the outstanding amount of Rs. 150000. On 11 Aug 2016, he made additional purchase of Rs. 70000. Rate of interest charged by bank is 2 % per month.

Answer the following questions

01. What would be the minimum payment requirement on credit card dues during any month?

a. 3% of due

b. 5% of due

c. 8% of due

d. 10% of due

Ans - b Minimum payment require 5%

02. As the bank charges interest at 2% per month, what would be the annual effective rate to the user?

a. 24.52%

b. 26.82%

c. 27.92%

d. 28.64%

Ans - b

Solution Effective interest rate=(1+r)^n-1 = (1+0.02)^12-1 = 1.26824-1 = 0.26824 = 26.82%

.....

03. Daily interest charged on outstanding balance as on 11 Aug 2016 will be .....

a. Rs.60.50

b. Rs.65.75

c. Rs.70.10

d. Rs.75.25

Ans - b

Reverse Mortgage Loan (RML) Scheme, though apparently enables senior's regular income by pledging home with the lending bank, the product has not met with much success due to obvious reasons such as non-availability of regular income beyond tenure leading to uncertainty as to how manage without payment after the loan term, quantum etc. To overcome the weakness of the scheme, an improved Reverse Mortgage Loan enabled Annuity Scheme (RMLeA) has evolved as significant improvement over the initial RML product variant.

Answer the following question:

01. RMLeA scheme has been promoted by .....

(i)National Housing Bank(ii)HDFC Ltd(iii)Central Bank of India(iv)Star Union Daichi life insurance Company Itd.

a. (i) and (ii) only
b. (iii) and (iv) only
c. (i),(iii) and (iv) only
d. (i),(ii) and (iii) only

Ans - b

02. Which of the following features are true in respect of RMLeA?

(i) Married couples will be eligible as joint borrower for financial assistance

(ii) Joint borrower will have the option to receive the annuity separately in their respective individual names on proportionate basis that may decide

(iii)The senor Citizen borrower are eligible to receive assured life-time payments even after completion of the fixed term with increased quantum of annuity

(vi) The periodic annuity payments are subject to Income Tax and Taxable in the hand of the annuity recipients.

a. (i),(iii) and (vi)are correct
b. (ii),(iii) and (vi)are correct
c. (iii),(ii) and (i)are correct
d. All (i),(ii),(iii) and (vi)are correct

Ans - a

03. The LTV in respect of Senior Citizen in the age bracket of 70-80 as per the scheme is .....

a.50% b.75% c.70%

## www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in **Facebook Groups** JAIIB CAIIB STUDY MATERIALS / CAIIB DISCUSSION -**BANK PROMOTION EXAMS / ONLY FOR BANKERS** murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442 d.60% Ans - c 04.Under reverse Mortgage Loan Enabled Annuity(RMLeA), which of the following are considered as the primary annuity sourcing institution? a. Scheduled Commercial Banks b. Housing finance Companies c. Life insurance Corporations\* d. All the above Ans - c Mr. X wants to receive Rs. 40000 p.a. for 20 years by investing @ 5%. How much he will have to invest now? a. 498489 b. 498849 c. 498948 d. 498984 Ans - a

Explanation :

Here,

P = 40000 R = 5% p.a. T = 20 yrs

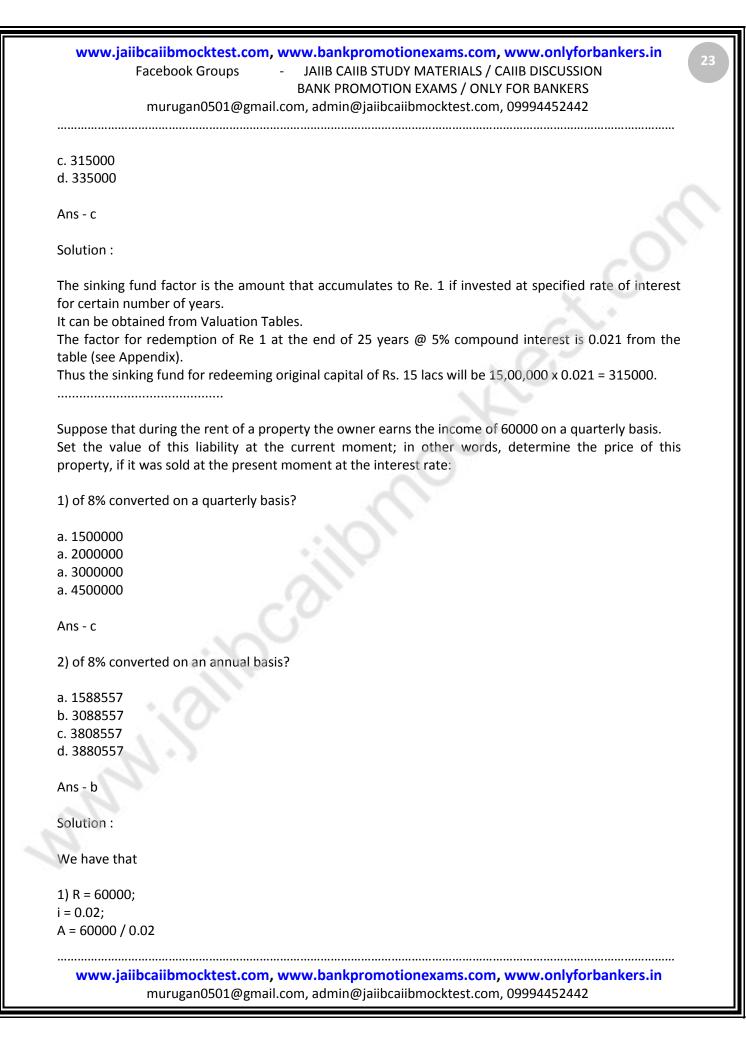

PV = P / R \* [(1+R)^T - 1]/(1+R)^T

PV = (40000 ÷ 0.05) \* {(1.0520 − 1) ÷ 1.0520} = 498489

What will be sinking fund for redeeming capital of Rs. 15 lacs at the end of 25 years @ 5% compound interest?

a. 275000 b. 295000

> www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

= 3000000

Thus, the market value of this property is 3000000.

2) In the case we have a complex annuity, thus: R = 60000, i = 0.08, c = 0.25 Then p = 1.08^0.25 - 1 = 0.0194265 A = 60000/0.0194265 = 3088557

In this case the value of this property is 3088557.

.....

As we know today private, public and foreign banks issues ATM to his customers. ATM is now 24 hour banking service provider. Customer use ATM not only to withdraw cash from machine but also to make shopping on various sites. Some banks offer additional facilities on ATM card i.e Accidental cover and some give a facility to withdraw money beyond the limit. It has changed the banking scenario globally, today a person who don't have money in a foreign country can withdraw money from ATM.

Answer the following questions on ATM/Debit card

1. Max cash withdrawal limit for POS in Tier I and II centres?

a. Rs.1000/- in one transaction

b. Rs.1000/- can be withdrawn daily

c. Rs.5000/- in one transaction

d. Rs.5000/- can be withdrawn daily

2. Max withdrawal on other bank's ATM in one transaction?

a. Rs 5,000/-

b. Rs 10,000/-

c. Rs 15,000/-

d. Rs 20,000/-

3. Max free allowed limit in a month on other banks ATM Machine?

a. 2

b. 3

c. 5

d. 10

4. Max free allowed limit in a month on other banks ATM Machine located in the six metro centres?

.....

a. 2

ABC company just issued 50 Lakhs Rs. 100-par bonds payable carrying 8% coupon rate and maturing in 15 years. The bond indenture requires the company to set up a sinking up to pay off the bond at the maturity date. Semi-annual payments are to be made to the fund which is expected to earn 5% per annum. Find the amount of required periodic contributions.

a. 1,83,81,820
b. 1,81,83,820
c. 1,13,88,820
d. 1,08,83,820

Ans - c

Solution

The future value required to be accumulated equals 50 Crores (50,00,000 × 100)

Since the payments are semi-annual, the periodic interest rate =  $5\% \div 2 = 2.5\%$ 

Number of periods =  $2 \times 15 = 30$ 

Periodic Contribution to Sinking Fund  $PMT(FV) = (FV / (((1+i)^n - 1) / i))$ 

PMT = Payment per Time Period FV = Future Value i = Interest Rate per Time Period n = Number of Time Periods

= (50,00,00,000 / (((1+0.025)^30 - 1) / 0.025) = (50,00,00,000 / ((2.097567579 - 1) / 0.025) = (50,00,00,000 / (1.097567579 / 0.025) = (50,00,00,000 / 43.90270316) = 1,13,88,820

So, ABC company must deposit Rs. 1,13,88,820 at the end of each 6 months for 15 years in order to accumulate enough money to pay off the bonds when they are due.

.....

XYZ Publishers buy a machine for Rs 20000. The rate of depreciation is 10%. Find the depreciated value of the machine after 3 years. Also find the amount of depreciation. What is the average rate of depreciation?

a. 7.066 b. 8.033

c. 9.033	
d. 10.066	
Ans - c	
Solution	
Original valı	lue of machine = Rs 20000,
•	preciation, i = 10%
Hence the b	book value after 3 years = 20000
= 20000 (0.9	9)^3
= 20000 (0.7	
= Rs. 14580	
Amount of (	depreciation in 3 years = Rs 20000 - Rs 14580 = Rs 5420
Average rat	te of depreciation in 3 years
= (5420/200	000) x (100/3) = 9.033%

A company wants to set up a sinking fund for the repayment of a loan of Rs. 10 Crores at the end of four years. It makes equal deposits at the end of each month into a fund that earns interest at 12% per year compounded monthly. Determine the size of each deposit. Also construct a sinking fund schedule (the first three months only).

a. 15,33,383
b. 15,88,383
c. 16,33,383
d. 16,88,383

Ans - c

Solution :

Loan is 10 Crores to be repaid at the end of 4 years. Monthly deposits are made. Interest rate is 12% per year compounded monthly. This is a Payment for a Future Value type problem.

PAYMENT FOR A FUTURE VALUE EQUATION

 $PMT(FV) = (FV / (((1+i)^n - 1) / i))$ 

PMT = Payment per Time Period FV = Future Value

CII for 2012-13 = 852 CII for 2013-14 = 939 CII for 2014-15 = 1024

a. Indexed Capital Gains Taxb. Non Indexed Capital Gains Taxc. Both are samed. None of the above

Ans - b

Solution :

Each purchase/sale transaction is matched on a First-In-First-Out basis.

All the units sold have been held for over one year, so long term capital gains tax applies.

So here, out of the 5000 units sold, we have three separate pieces to be considered.

The First 2000 are matched to the first 2000 bought, appropriately indexed, gains calculated and tax calculated.

Here you get two years of Indexation (2012-13 and 2014-15)

Indexed Purchase Price = 40,000 \* (1024/852) = 48,075 Capital Gain = 100000 - 48075 = 51925 The non-indexed gain is Rs. (100000 - 40000) = Rs. 60000

Indexed Capital Gain: Rs. 51925 Non Indexed Capital Gain: Rs. 60000

The First 2000 are matched to the first 2000 bought, appropriately indexed, gains calculated and tax calculated.

Here you get two years of Indexation (2013-14 and 2014-15)

Indexed Purchase Price = 60,000 \* (1024/939) = 65431 Capital Gain = 100000 - 65431 = 34569 The non-indexed gain is Rs. (100000 - 60000) = Rs. 40000

Indexed Capital Gain: Rs. 34569 Non Indexed Capital Gain: Rs. 40000

The next 1000 weite are cold a	t Do EO and hought at Do 40, and remaintally independenced and	
tax calculated.	t Rs. 50 and bought at Rs. 40, appropriately indexed, gains calculated and	
Here you get two years of Ind	exation (2013-14 and 2014-15)	
Indexed Purchase Price = 40,0		
Capital Gain = $50000 - 43620$		
The non-indexed gain is Rs. (5	0000 - 40000) = Rs. 10000	
Indexed Capital Gain: Rs. 6380	)	
Non Indexed Capital Gain: Rs.		
So let's add them all up.		
Indexed		
Total Capital Gain	= 51925 + 34569 + 6380 = 92874	
Capital Gains Tax Appl (%)	= 20%	
Capital Gains Tax	= 18575	
Non-Indexed		
Total Capital Gain	= 60000 + 40000 + 10000 = 110000	
Capital Gains Tax Appl (%)	= 10%	
Capital Gains Tax	= 11000	
He should go ahead to choose 7575/	e the non-indexed option to save some tax of Rs. (18575 - 11000) = Rs.

Interest on housing loan can be claimed as a deduction from income from property, salary, business/ profession, capital gains, or any other source upto a maximum of Rs. 1,50.000 under section 24(b) of the Income-tax Act, 1961 every year subject to fulfilment of the following conditions. Find the FALSE one :

a. Loan has been taken on or after 1st April 1999.

b. Loan is for purchase or construction of a residential property or as re-finance (takeover) of the principal amount outstanding under a loan taken earlier for purchase or construction of a residential property. However, in case of loan for construction, the construction should get completed within 3 Years of raising the Loan. Deduction can be claimed only from the financial year when the purchase/ construction is completed.

c. The lender issues a certificate at the end of the financial year mentioning therein the interest & principal paid during the year in respect of that loan.

d. If any of the first 2 Conditions mentioned above is not satisfied, i.e., loan was taken before 1st April 1999 &/or loan is for repairs/renovation/reconstruction, deduction of only up to a maximum of Rs. 100,000 every year can be claimed. The third condition mentioned above, however, has to be satisfied.

Ans - d

.....

The loans sanctioned by banks for housing projects exclusively for the purpose of construction of houses only to economically weaker sections and low income groups, having family income, ..... irrespective of location, the total cost of which do not exceed ..... per dwelling unit.

a. Rs 100000/- & Rs 5 lacs b. Rs 120000/- & Rs 15 lacs c. Rs 120000/- & Rs 10 lacs d. Rs 24000 & Rs 1 lacs

Ans - c

.....

Bank loans to Housing Finance Companies (HFCs), approved by NHB for their refinance, for on-lending for the purpose of purchase/construction/reconstruction of individual dwelling units or for slum clearance and rehabilitation of slum dweller:

a. Aggregate loan limit Rs 5 lacs per dwelling unit

b. Rs 10 lacs per borrower

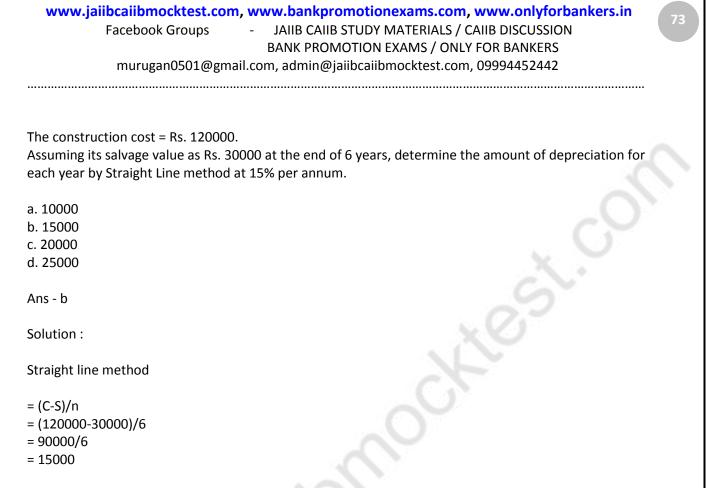

c. Rs 5 lacs

d. Rs 1 lacs

Ans - b

.....

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

At the end of 6 years, total depreciation is Rs. 90000 and book value is 120000 - 90000 = 30000 (salvage value)

.....

The construction cost = Rs. 120000.

Assuming its salvage value as Rs. 30000 at the end of 6 years, determine the amount of depreciation for 3rd year by WDV method at 15% per annum.

a. 15000

b. 15600

c. 12000

d. 12380

Ans - b

Solution :

WDV method, the rate of depreciation

```
R = (1-((S/C)<sup>1</sup>/n))*100
= (1-((30000/120000)<sup>1</sup>/n))*100
= (1 - 0.7936) * 100
```

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442	
Which of the following facilities of mobile banking "UMOBILE" with a tagline "Bank in Your Pocket" launched by Union Bank of India is available to the customers:	
a. Bill Payments.	
b. Airline Ticketing.	
c. Movie Ticketing.	
d. All of the above.	
Ans - d	
Which of the following facilities of mobile banking "UMOBILE" with a tagline "Bank in Your Pocket" launched by Union Bank of India is not available to the customers:	
a. Corporate Fund Transfer.	
b. Temple Donations and Fee Payments	
c. Stop Payments of Cheques.	
d. Request for regular cash withdrawals.	
Ans - d	
If the sanctioned loan amount is Rs. 100000 at 12% interest for 2 years, calculate the EMI.	
a. 3077	
b. 3707	
c. 4077	
d. 4707	
Ans - d	
Solution :	
EMI= P x r x (1 + r)^n / ((1+r)^n -1)	
Here p = principal amount (loan taken)	

r = interest rate per month (ex: if interest rate per annum is 10% then 10/(12\*100)) n = tenure in months

EMI = 100000\*0.01\*(1+0.01)^24 /((1+0.01)^24 -1) = 4707

Where,

p = loan taken = 1,00,000

Planet Plastics Inc. makes toys. It recently bought a new machine, on January 1, that molds plastic pellets into the desired shapes. The price of that machine was Rs60,000. It cost Rs1,500 to deliver the machine to the factory. It cost Rs2,500 to install and properly calibrate the machine. It has an expected useful life of 8 years, and is expected to have a zero salvage value at the end of those 8 years. Planet Plastics uses the straight-line method of depreciation.

1. What is the capital cost of the new machine?

The time limit for returning of the securities / documents / title deeds of mortgaged property is ...... days from the repayment of all dues agreed to or contracted.

a. 7 days b. 15 days c. 21 days d. 30 days

Ans - b

.....

Select the FALSE one in case of Priority of Charge

a. Where a mortgagor creates more than one equitable mortgage over the same property in favour of two financing institutions, the institution in whose favour the mortgage is created first, has priority of charge.

b. Where a mortgagor has created separate registered mortgages over the same property in favour of two or more financing institutions, the priority of charge will be determined with reference to the date of the execution of the deeds which has been duly registered within four months of execution (not the date of registration).

c. Where a mortgagor gives the same property in equitable mortgage to one financing institution and in registered mortgage to another financing institution, the priority of charge will be determined with reference to the date of deposit of title deeds in equitable mortgage and the date of execution of registered mortgage deed. An equitable mortgage in no way gives inferior rights compared to a registered mortgage.

Calculate the Capital Gain, if you had bought 2000 units of a debt fund at Rs. 60 per unit in June 2012 and sold the 1000 units in August 2014 for Rs. 80.

CII for 2012-13 = 852 CII for 2013-14 = 939 CII for 2014-15 = 1024

a. 7211 b. 7121 c. 7878 d. 7887

Ans - d

Solution :

Purchase Price = 1000 x 60 = Rs. 60,000 Sale price = 1000 x 80 = Rs. 80,000

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in Facebook Groups - JAIIB CAIIB STUDY MATERIALS / CAIIB DISCUSSION BANK PROMOTION EXAMS / ONLY FOR BANKERS murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442
Indexed Cost of Acquisition = 60,000 x (1024/852) = 72,113 Capital gain = 80,000-72,113 = 7887
Please remember : Unsold units don't attrat Capital Gains until they are sold.
Which of the following dimensions do not relate to Marketing in Retail Banking?
a. Identifying the most profitable markets now and in the future.
b. Assessing the present and future needs of customers.
<ul><li>c. Setting business development goals and making plans to meet them.</li><li>d. None of the above</li></ul>
Ans - d
Commercial Credit Bureau of CIBIL covers credit availed by
a. Individuals
b. Non-Individuals
c. NBFCs
d. None
Ans - b
If Rs. 75000 is invested for a period of 4 years at interest at 12% p.a. Find the maturity sum i.e. future value-with the help of Future value table given below :
Year 7% 8% 9% 10% 11% 12%
1 1.07 1.08 1.09 1.10 1.11 1.12
2 1.14 1.17 1.19 1.21 1.23 1.25
3 1.23 1.26 1.29 1.33 1.36 1.40
4 1.31 1.36 1.41 1.46 1.51 1.57
5 1.40 1.47 1.54 1.61 1.68 1.76 6 1.50 1.59 1.68 1.97 1.87 1.97
a. 111750
b. 115100 c. 117700
d. 117750
Ans - d

.....

Solution :

Future value = PV x future value factor = 75000 x 1.57 = 117750

Electronic Channels in retail banking refers to .....

a. Facility of ATMsb. Facility of Internet Bankingc. Facility of Mobile Bankingd. All the above.

Ans - d

.....

Miss. Radha had applied for a Auto/Vehicle loan for a new car of Rs. 4 Lakhs. The total cost price for which is Rs. 5 Lakhs. What is the maximum loan amount which can be sanctioned to him?

a. Rs. 3,00,000 b. Rs. 3,50,000 c. Rs. 3,75,000 d. Rs. 4,00,000

.....

Ans - d

Find out the encumbrance factor from following particulars of the property :

Land area - 600 Sq m Total built-up area - 400 Sq m Permissible FSI - 1 Rate of construction cost - Rs. 10000 per Sq m Rate of land cost - Rs. 4000 per Sq m Desired rate of return - 10% Usable carpet area - 200 Sq m Monthly Rent on carpet area basis - Rs. 100 per Sq m Usual outgoings - 1/6 of yield

a. 0.766

b. 0.833

c. 0.866

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

d. 0.933		
Ans - b		
Solution :		
	nstruction = 400 x 10000 = 4000000	
Cost of FS	l used = 400 x 4000 = 1600000	
Total cost	= 5600000	
	eld @ 10% = 5600000 x 0.1 = 560000	
	Yield = $100 \times 200 \times 12 = 240000$	
	goings = $1/6$ of yield = $240000/6 = 40000$	
Net annua	al yield = 200000	
Hence en	cumbrance factor = 200000/240000 = 0.833	
-	I = 600 - 400 = 200  Sq m	
	$sable FSI = 200 \times 0.833 \times 4000 = 666400$

Solution :

Future value

= PV x future value factor

= 100000 x 1.61

= 161000

.....

Find out the value of the usable FSI from following particulars of the property :

Land area - 600 Sq Sq m Total built-up area - 400 Sq m Permissible FSI - 1 Rate of construction cost - Rs. 10000 per Sq m Rate of land cost - Rs. 4000 per Sq m Desired rate of return - 10% Usable carpet area - 200 Sq m Monthly Rent on carpet area basis - Rs. 100 per Sq m Usual outgoings - 1/6 of yield

a. 556400

b. 565400

c. 664600

d. 666400

Ans - d

Solution :

Cost of construction = 400 x 10000 = 4000000 Cost of FSI used = 400 x 4000 = 1600000 Total cost = 5600000

Desired Yield @  $10\% = 5600000 \times 0.1 = 560000$ Estimated Yield =  $100 \times 200 \times 12 = 240000$ Usual outgoings = 1/6 of yield = 240000/6 = 40000Net annual yield = 200000

Hence, encumbrance factor = 200000/240000 = 0.833 Usable FSI = 600 - 400 = 200 Sq m Value of usable FSI = 200 x 0.833 x 4000 = 666400

 BANK PROMOTION EXAMS / ONLY FOR BANKERS
 murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

 Mr. Raj has bought :
 2000 units of a stock at Rs. 20 on 1 Jan 2013, 2000 more units at Rs. 30 on 1 May 2013

 2000 more units at Rs. 40 on 1 December 2013

 and sold

 5000 units at Rs. 50 on 30 December 2014,

 Calculate the Indexed Capital Gains.

CII for 2012-13 = 852 CII for 2013-14 = 939 CII for 2014-15 = 1024

a. 89742
b. 92874
c. 94872
d. 97482

Ans - b

Solution :

Each purchase/sale transaction is matched on a First-In-First-Out basis.

All the units sold have been held for over one year, so long term capital gains tax applies.

So here, out of the 5000 units sold, we have three separate pieces to be considered.

The First 2000 are matched to the first 2000 bought, appropriately indexed, gains calculated and tax calculated.

Here you get two years of Indexation (2012-13 and 2014-15)

Indexed Purchase Price = 40,000 \* (1024/852) = 48,075 Capital Gain = 100000 - 48075 = 51925

The Next 2000 are matched to the Next 2000 bought, appropriately indexed, gains calculated and tax calculated.

Here you get two years of Indexation (2013-14 and 2014-15)

Which is not correct in case of Priority of Charge?

a. Where a mortgagor creates more than one equitable mortgage over the same property in favour of two financing institutions, the institution in whose favour the mortgage is created first, has priority of charge.

b. Where a mortgagor has created separate registered mortgages over the same property in favour of two or more financing institutions, the priority of charge will be determined with reference to the date of the execution of the deeds which has been duly registered within four months of execution (not the date of registration).

Interest on housing loan can be claimed as a deduction from income from property, salary, business/ profession, capital gains, or any other source upto a maximum of Rs. 1,50.000 under section 24(b. of the Income-tax Act, 1961 every year subject to fulfilment of the following conditions-FIND FALSE ONE

a. Loan has been taken on or after 1st April 1999.

b. Loan is for purchase or construction of a residential property or as re-finance (takeover) of the principal amount outstanding under a loan taken earlier for purchase or construction of a residential property. However, in case of loan for construction, the construction should get completed within 3 Years of raising the Loan. Deduction can be claimed only from the financial

year when the purchase/ construction is completed.

c. The lender issues a certificate at the end of the financial year mentioning therein the interest & principal paid during the year in respect of that loan.

d. If any of the first 2 Conditions mentioned above is not satisfied, i.e., loan was taken before 1st April 1999 &/or loan is for repairs/renovation/reconstruction, deduction of only up to a maximum of Rs. 100,000 every year can be claimed. The third condition mentioned above, however, has to be satisfied.

Ans - d

.....

Pick the Odd One

a. No Tax Benefit is available in respect of Loan taken for purchase of plot of land. Hence, instead of taking a Loan for purchase of plot, he/she should take loan for purchase of plot as well as construction of house & complete construction of a self-sufficient House within 3 Years of raising the Loan.

b.If Loan is raised jointly by husband & wife or any other combination of persons acceptable to the lender, the interest & principal can be claimed by the co-borrowers in proportion to the amounts paid by them, subject to the combined maximum limit of Rs. 1,50,000 (or Rs. 30,000) & Rs. 1.00.000 towards interest & principal respectively.

c.If the housing loan is taken before 1st April, 1999, deduction on account of interest shall be limited to Rs. 30,000 every Year. However, if the loan is taken after 1st April, 1999, deduction of interest upto Rs. 1,50,000 can be claimed every Year.

d. As regards principal repayment, it can be claimed as a deduction from the gross total Income only by an Individual/HUF borrower under section 80C of the Income Tax Act, 1961 cannot exceed Rs. 1,50,000

Desired Yield @ 9% = 1435000 x 0.09 =129150 Estimated Yield = 50 x 155 x 12 = 93000 Usual outgoings = 1/6 of yield = 93000/6 = 15500 Net annual yield = 77500

Hence, encumbrance factor = 77500 = 0.833 93000 Usable FSI = 533 - 205 = 328 Sq m Value of usable FSI = 328 x 0.833 x 2000 = 546448

.....

A newly constructed building stands on a plot costing Rs. 100000. The construction cost of building is Rs. 2000000 and the estimated life of building is 66 years. The investor wants a 5% return on land cost and 8% return on the construction cost. Calculate the annual rent to be charged if annual repairs cost 0.5% of cost of construction and other outgoings equal 30% of gross rent. The co-efficient for sinking fund at 3% for 66 years may be taken as 0.005.

Return on land cost = 5% of 100000 = 5000 Return on construction cost = 6% of 2000000 = 120000 Total Income desired = Rs. 125000 (a)

Let gross annual rental be 'r'

Outgoings:

Annual repairs = 0.5% of 2000000 = 10000Other outgoings = 30% of r or 0.30 r Amount towards sinking fund =  $0.005 \times 2000000 = 10000$ Hence, net income = r - 0.30 r - 20000 (b)

Equating (a) and (b),

0.70r - 20000 = 125000 0.70r = 125000 - 20000 0.70r = 105000 r = 105000/0.70 = 12500

Hence, rent per month = Rs. 12500

Assum	ning its salvage v	alue as Rs. 3000	ructed at a cost of Rs. 120000. 0 at the end of 6 years, determine the amount of depreciation for WDV method at 15% per annum.		
Straig	ht line method				
= (C-S)	)/n				
	000-30000)/6				
- 9000	-				
= 1500	00				
At the	end of 6 years.	total depreciatio	on is Rs. 90000 and book value is 120000 - 90000 = 30000 (salvage		
value)	•				
WDV	method				
	- (-) (				
-	-S/C)^1/n				
•	30000/120000)^	-			
= 1 - (	0.7936 = 0.2064				
The fo	llowing table sh	ows depreciatio	n chart @ 20.64%		
Age	Depreciation	Accumulated	WDV		
	for the year	depreciation			
1	24770	24770	95230		
2	19650	44420	75580		
3	15600	60020	59980		
4	12380	72420	47600		
5	9820	82220	37780		
6	7780	90000	30000		
Thus, '	the WDV at the	end of 6 years is	Rs. 30000, which is the salvage value of the property.		
Formu	ıla to Calculate t	he Periodic Payn	nents under RML		
The fo	rmula to calcula	ite the periodic p	payments, as available in the website of NHB, is as under:		
Install	ment Amount =	(PV*LTVR*I)/ ((1	L+I)n-1) Where,		
PV = P	roperty Value;				
LTVR =	= LTV Ratio;				
n = No	o. of Installment	Payments;

.....

The sinking fund factor is the amount that accumulates to Re. 1 if invested at specified rate of interest for certain number of years.

It can be obtained from Valuation Tables.

The factor for redemption of Re 1 at the end of 25 years @ 5% compound interest is 0.021 from the table (see Appendix).

Thus the sinking fund for redeeming original capital of Rs. 15 lacs will be 15,00,000 x 0.021 = 315000.

.....

In actual practice, separate provision for sinking fund is not done but the capitalized value is obtained by referring to dual rate Valuation Tables to determine the multiplying factor (YP) based on income for a specified period (life of building) at particular interest rate and redemption of capital at another rate of interest.

Thus the YP or present value of Re 1 per annum for income @ 10% rate of interest and redemption of capital @ 5% rate of interest for a period of 25 years is 8.27 as per the tables (see Appendix). In other words, if a property is purchased for Rs. 8,00,000, its capitalized value will be 8.27 x 8,00,000 = 66,16,000.

.....

Suppose that during the rent of a property the owner earns the income of 60000 on a quarterly basis. Set the value of this liability at the current moment;

in other words, determine the price of this property, if it was sold at the present moment at the interest rate:

of 8% converted on a quarterly basis?
 of 8% converted on an annual basis?

We have that

1) R = 60000; i = 0.02; A = 60000 / 0.02 = 3000000:

Thus, the market value of this property is 3000000.

2) In the case we have a complex annuity, thus: R = 60000, i = 0.08, c = 0.25 Then p = 1.08^0.25 - 1 = 0.0194265 A = 60000/0.0194265 = 3088557

In this case the value of this property is 3088557.

.....

Mr. Raj has bought :

2000 units of a stock at Rs. 20 on 1 Jan 2013, 2000 more units at Rs. 30 on 1 May 2013 2000 more units at Rs. 40 on 1 December 2013

and sold

5000 units at Rs. 50 on 30 December 2014,

Calculate the Non Indexed Capital Gains.

a. 100000

b. 110000

c. 120000

d. 130000

Ans - b

Solution :

Each purchase/sale transaction is matched on a First-In-First-Out basis. All the units sold have been held for over one year, so long term capital gains tax applies. So here, out of the 5000 units sold, we have three separate pieces to be considered. The First 2000 are matched to the first 2000 bought, appropriately indexed, gains calculated and tax calculated.

The non-indexed gain is Rs. (100000 - 40000) = Rs. 60000

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

The device, the cost of which is 120000, must be replaced after six years. It is known that after six years the used equipment could be sold for 20000. Set the value of the property at the present moment (capitalize the costs) if the interest rate is 10%, which is converted once a year?

We have that OV = 120000, the replacement costs R = 120000 - 20000 = 100000,

In addition,

i = 0.15; c = 1/(1/6) = 6 and p = 1.1^6 - 1 = 0.7716

Then K = 120000 + (100000/0.7716) = 249607.4

.....

A.B. purchased a license to engage in the transportation services for which he paid 6000. Moreover, he paid 30000 for the purchased car.

He hopes to replace a car with a new one every three years, hoping to allocate 30000 for a new car. In addition, he can sell the car for 10000.

Determine the costs of this business, if the interest rate is 12%.

We have that the initial business costs are 35000, the replacement costs are R = 30000 - 10000 = 20000,

In addition, i = 0.12; c = 3; p = 0.404928: Then

K = 35000 + (20000/0:404928)

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in **Facebook Groups** JAIIB CAIIB STUDY MATERIALS / CAIIB DISCUSSION **BANK PROMOTION EXAMS / ONLY FOR BANKERS** murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442 = 84391.5Thus, the capitalized general business costs will be 84391.5 How To Calculate Long Term Capital Gains Tax When you sell an asset like a stock or mutual fund after a year – in some cases, like Gold, three years – you need to pay long term capital gains tax. Equity mutual funds where more than 65% of the holding is equity don't have long term cap gains tax currently, and neither does stock held for over a year – in both cases, you will pay a Securities Transaction Tax on the sale. There are two ways to calculate long term capital gains tax. Without Indexation The government understands that you might buy a product this year, but sell it after a few years. But in the process, inflation has destroyed the value of your money – i.e. what might cost Rs. 100 today might cost Rs. 130 in five years (assuming 5.4% inflation – remember, inflation is compounded). So if you sell the product after five years for Rs. 150, your gain really is Rs. 20. To calculate this actual gain, the Income Tax department releases a cost-inflation-index (CII) figure every year. Usually, in May, it will release the CII for the last financial year - so the CII for 2010-11 will be released in May 2011. And it's not easy to find; but luckily enough people get to know and Google becomes a good friend. Effectively, the cost of acquisition becomes substantially lower. The formula is: Indexed Cost of Acquisition = (Actual cost of purchase) \* (CII Of Year of Sale)/(CII of Year of Purchase). Capital Gain = (Sale Price MINUS Indexed Cost of Acquisition). Capital Gains Tax = 20% of Capital Gain For example, if you bought 1000 units of a debt fund at Rs. 50 per unit in 2008-09 and sold the 1000 units in 2009-10 for Rs. 55, then: (Purchase Price = Rs. 50,000 and Sale price = 55×1000 = Rs. 55,000) a) Indexed Cost of Acquisition = 50,000 x (632/582) = 54,295. b) Capital gain = 55,000-54,295 = 705. c) Capital Gains tax = 20% of 705 = Rs. 141. The indexation benefit allows you to let inflation take its toll on the purchase price; there is no such allowance for "short term" capital gains, in a mutual fund or stock sold within a year of purchase. In that

murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

.....

case, the gain (non-indexed) is simply added to your income and your income is taxed appropriately, and that effectively means short term capital gains are taxed at the highest slab that applies to you.

The indexation benefit also substantially increases your post-tax return when you use a mutual fund rather than, say, a fixed deposit. The mutual fund is indexed for inflation, but the FD return is not (even the annual interest for a multi year deposit is added to your gross income and taxed).

### Without Indexation

To make life a little simpler, there is an allowance to ditch the entire indexation concept, where you have sold a mutual fund (or a stock outside the stock exchanges, say in a buyback offer). The idea is: your non-indexed capital gain = Sale Price MINUS purchase price. On that you pay just 10%.

You can choose with indexation or without indexation for every asset sale for the total capital gain that you have. In some cases it may be better to pay just 10%. For instance if you bought a stock 10 years ago, chances are it has multiplied so much that any amount of indexation doesn't cut much into your profits; you are then better off paying 10% of the unindexed gain rather than 20% of indexed gains.

Note: Reader Px noted that the IT department may not allow part of such debt mutual fund gains to be indexed and part not to be. This means you have to calculate your total gains with such indexation, and then without such indexation. Then see if the taxes are different on the two. That makes sense, but is complicated in the sense that you don't get the best benefit on your assets if you sell a lot of them. But I admit – this looks like something the IT department will allow more than my earlier assumption (i.e. choose indexation or not for each asset sale). I have changed the post – my apologies.

Example: Different purchase dates and FIFO

Now I will complicate matters. If you have bought :

- \* 1000 units at Rs. 10 on 1 Jan 2008,
- \* 1000 more units at Rs. 15 on 1 May 2008
- \* 1000 more units at Rs. 16 on 1 December 2008

### and sold

\* 2500 units at Rs. 17 on 30 December 2009,

How are the gains calculated?

Answer: Each purchase/sale transaction is matched on a First-In-First-Out basis. This is like a queue – the first person who is in the queue gets serviced first and get out, then the next and so on. Versus a "LIFO" or Last-In-First-Out, like in a crowded lift or a metro train where the last person in usually ends up getting pushed out before others can leave. The IT department needs FIFO.

All the units sold have been held for over one year, so long term capital gains tax applies.

BANK PROMOTION EXAMS / ONLY FOR BANKERS

murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

So here, out of the 2,500 units sold, we have three separate pieces to be considered.

The First 1000 are matched to the first 1,000 bought, appropriately indexed, gains calculated and tax calculated.

Here you get two years of Indexation (2007-08 and 2008-09) because the purchase to sell dates span two financial years – Jan 08 to December 09. Indexed Purchase Price = 10,000 \* (632/551) = 11,470. Capital Gain = 17,000 - 11,470 = 5,530The non-indexed gain is Rs. (17,000-10,000) = Rs. 7,000.

Indexed Capital Gain: Rs. 5,530 Non Indexed Capital Gain: Rs. 7,000

The Next 1000 units get one year's indexation because they are off by just one financial year (Jun 2008 to Dec 2009) These were purchased for Rs. 15,000.

Indexed Purchase Price = 15,000 \* (632/582) = 16,289 Capital Gain = 17,000 – 16,289 = 711 Without indexation: The Capital Gain is Rs. 2,000 (17,000 minus 15,000)

Indexed Capital Gain: Rs. 711 Non Indexed Capital Gain: Rs. 2,000

The next 500 units are sold at Rs. 17 and bought at Rs. 16, which are again provided one year's indexation.

Indexed Purchase Price = 16 \* 500 \* (632/582) = 8,687 Capital Gain = 17 \* 500 - 8,687= (Loss of Rs. 187). The unindexed gain is (Rs. 17-16) \* 500 units = Rs. 500.

Indexed Capital Gain: Loss of Rs. 187 Non Indexed Capital Gain: Rs. 500

So let's add them all up.

IndexedNon-Indexed Total Capital Gain 6054 9500 Capital Gains Tax Applicable (%) 20% 10% Capital Gains Tax 1210.8 950 You can choose which one of the two you want, and in this case the non-indexed option is better – you pay lower taxes.

Note: Long term capital gains must be all added up but in case of other assets (like houses or gold or such) you don't get to choose between 10% unindexed and 20% indexed. There it's only indexed (and long term applies only after three years). So if you have sold a house and some mutual funds, the calculation will take on the indexation or non-indexation benefit only for the mutual fund bits.

Nowadays most software do this for you, and brokerages provide detailed statements as well. (See MProfit, for instance. Disclosure: I'm not associated but a good friend works with them)

Gains are based on the number of units sold, and each unit's purchase price. What is left in the kitty in the above example is 500 units bought at Rs. 16. That will not attract any tax until you sell. The investor may buy more before selling, adding to calculation complexity.

I hope this helps clarify a subject I get a lot of email for. Please send in your comments!

Note: I'm not a CA – this is my understanding of the tax law. Apologies upfront for any mistakes; please let me know and I will correct.

(While the tax rates change with the Direct Tax Code (DTC), calculation methodology will remain the same, though non-indexation benefits might vanish)

.....

How to calculate Capital Gains or Losses . A lot of people make mistake in this . If you buy a house in 1995 at Rs 10 lacs and sell it at Rs 20 lacs in 2009 . On how much profit will you pay the tax ? If your answer is Rs 10 lacs , you have no idea how to calculate capital gains . Read ahead to understand .

What is Capital Asset ?

Capital Assets are the properties which can be held by a person . Some examples are Real Estate, Shares, Mutual Funds , Gold and Debt Funds . FD's and other fixed returns Instruments are not part of it .

Taxation

For taxation of Capital Assets , read this : How to use your looses to Reduce Tax

How to Calculate Capital Gains?

Most of the people think that

Capital Gain = Sell Price – Purchase Price

But , Actually the real formula is

Capital Gain = Sell Price – Indexed Purchase Price What is Indexation ?

Indexation is a technique to adjust income payments by means of a price Index , in order to maintain the purchasing power of the public after inflation. We must understand that prices in general also rises, so the actual prices should not be used while computing the profits , rather It should be Indexed as per Inflation in the country ,so that people can get the real value from sale of there assets . Indexation is used in Tax treatment for Debt , Gold and other asset classes

What is Cost Inflation Index (CII)?

How to Calculate Indexed Purchase Price ?

Indexed Purchase Price = Purchase Price \* (CPI for current year / CPI for year of purchase)

Once you have Indexed Purchase Price, you can subtract it from Sale Price and get your capital gains.

In some products Long term Capital gains is around 20% with Indexation and 10% without Indexation . In Equities Long term Capital Gains is exempt from Tax .

Let take an Example

Purchase Price 1000000 Year of Purchase 1995 Sale Price 2500000 Year of Sale 2008 No of Years 13 Purchase CII 281 Sale CII 582 Indexed Purchase Price 2071174 **Capital Gain** 428826 Tax with Indexation 85765 Tax without Indexation 150000

.....

Capital Gains Tax with Indexation and Without Indexation

There are some asset classes where you have the choice of using Indexation or not. This is true for debt funds and FMP's. So the current rate is either 20% with Indexation or 10% without Indexation for Long term Capital Gains .

For Tax without Indexation , you simply find out normal profit (sale price – cost price) and then calculate the tax .

So you can calculate tax using both ways and then choose the one which is lower :) .

How to save your Capital Gains Tax ?

For people who are miser and do not like to pay lot of taxes , govt has provided some relief to them . Govt says that If you dont want to pay tax on your capital gains , you can do following things to save your taxes .

BANK PROMOTION EXAMS / ONLY FOR BANKERS murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

Invest your Capital Gains in Real Estate : If you invest your Capital Gains in Real estate within 2 yrs , you will get the exemption .

Invest in Capital Gain Bonds :There are some specific bonds issued under sec 54EC, some of them are NHAI or REC bonds. You have to invest in these bonds within 6 months. Generally the lock in period is around 3+ yrs. interest on NHAI or REC bonds is around 5-5.5%.

Tax on Capital Gains can be different for different People

Please note that Capital Gains tax can vary from one person to other person depending on which tax bracket he/she belongs to . It will also depends whether Tax with Indexation or without Indexation works out to be cheaper for him or not .

Note :For calculation purpose the Financial years are business year from April – Mar , Not Jan – Dec . If you buy in June 2009 and sell in Jan 2010 , you are in the same year not 2 different years .

### Conclusion

So, In this post we learned how you can calculate capital gains and also take advantage of tax benefits for saving your taxes on capital gains, Your aim should be to understand the process and learn about it, so that you can take informed decisions in your financial life. No one should take advantage of your ignorance and also to take quick decisions and make rough calculations when there is a need. If you know these rules, you can take better decisions

Questions for you

Suppose you are age 30.

- In June, 2005, You buy 20 lacs Home
- In Aug, 2012, You buy stocks worth 10 Lacs
- In April, 2013 your sell your house at Rs 30 lacs
- In June 2013, your stocks have gone down in value are worth Rs 3 lacs now .

What should you do to avoid paying any tax on capital gains made from House ?

.....

Calculating capital gains on sale of property in India

When it comes to capital gains on real-estate, some people believe that the selling price, minus the purchase price is their profit, and the amount on which they would be subjected to capital gains tax. For example: Suppose you bought a house in India for Rupees 35 lakh in November 1995 and you sell this property in October 2010 for a price of say Rupees105 lakh. Some people may assume that the capital gain on the sale of this property would be 105 lakh (selling price - purchase price). This works out to a 70 lakh. Actually the calculation above is not correct. While deducting the purchase price of 35 Lakh, from

murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

.....

the sale price of 105 Lakhs, gives you a profit of 70 Lakh, this is not your capital gain. This is because when you factor in the cost inflation indexation, your taxable capital gain liability is reduced considerably.

What is Cost Inflation Indexing

One acceptable fact about money these days is that the value of the money decreases every year due to inflation. The department of income tax in India allows indexing the cost price, so as to arrive at a price that is comparable, to the sale price, when you sell your property. This price is referred to as the Indexed Cost of Acquisition.

How to calculate Long term capital gains on sale of property

The cost of acquisition of property that was purchased many years ago can be indexed, using the cost inflation index numbers. Cost inflation index, is a number derived for each financial year, by the Reserve Bank of India. This is done by taking into account the prevailing prices during that financial year.

Hence, if we see a change in the cost inflation index between the year 1995 and 2010, it would give us an indication of the change in prices between these years. To start off, first you need to find the Indexation factor from the cost indexing inflation table. The cost of inflation index table is provided on this website and you can see it by clicking HERE or simply use the left side red arrow, to go to our previous page to see the latest chart up to the years 2012/2013.

Formula to find the indexation factor:

Indexation Factor = Cost inflation index of the year of sale / Cost inflation index of the year of purchase.

Example: Suppose you purchased a house in November 1995 for Rupees 35 lakh and decide to sell it for Rupees 105 lakh in October 2010. Let's calculate the capital gains on such a transaction by applying the cost inflation index.

1. First we need to find the cost inflation index for the year of the sale. Using the cost inflation index chart table provided, we can see that the cost inflation index for the year 2010 when you want to sell is 711

2. The cost inflation index for the year 1995, when you purchased the property is 281.So using the formula, Indexation Factor = Cost inflation index of the year of sale / Cost inflation index of the year of purchase: Indexation Factor = 711 / 281 = 2.

Formula: Indexed Cost of Acquisition = Actual Purchase Price \* multiplied by the Indexation Factor. So your Indexed cost of acquisition when applying this formula works out to 35 lakh \* 2.53024 = 88.56 lakh. The actual capital gains that would apply for your property sale can now be calculated.

Calculating your long term capital gain

www.jaiibcaiibmocktest.com, www.bankpromotionexams.com, www.onlyforbankers.in

murugan0501@gmail.com, admin@jaiibcaiibmocktest.com, 09994452442

Long term capital gain is the difference between the sale price and the indexed cost of your acquisition.Formula: Long Term Capital Gain = Sale Price - Indexed Cost of Acquisition.Using the amounts from our example:Long Term Capital Gain = Rupees 105 Lakh - Rupees 88.56 Lakh = Rupees 16.44 Lakh.So the capital gain that seemed to be Rs. 70 lakh is actually only Rupees 16.44 lakh. This can even be further reduced, when you add all the expenses for your property upgrades, maintenance etc. and apply indexing to those figures also. Suppose Rupees 6.44 lakh was spent in making improvements to the property after you bought it in 1995. Then your final figure is trimmed down to a capital gain of 10 lakh. Considering a 20% capital gains tax rate, you would have to pay just 2 lakh.Cost inflation index for prior years: The benefit of indexation can be availed, either from the year of acquisition of the property by the assesse, or from the base year 1981-82, whichever is later.The financial year in India is from April to March. When reading the cost inflation index chart, the month of purchase needs to be taken into consideration. The latest cost of inflation index chart is available on the previous page.

.....

There are various asset classes such as equity, debt, goldand real estate in which you invest according to the time horizon of your financial goals and risk appetite. The gains from these investments are termed as capital gains and are taxed differently. Since any tax liability impacts your returns from the investment, it's important to have awareness on the net gains you will receive.

The capital gains from the above-mentioned asset classes are classified as long-term or short-term gains, based on the holding period of investment. For example, in real estate, if you have held the asset for more than 3 years, it is treated as long term. Contrary to this, in equities investment for more than a year is treated as long term.

Long-term capital gains are usually taxed at a lower rate than regular income, which is done to encourage entrepreneurship and also investment in the economy.

Here are some calculations to show how long-term and short-term capital gains are derived and how can they help you in reducing your taxability:

1. Long-Term Capital Gains: A long-term capital gain arises when you hold any asset for a defined period. This period ranges from one year to three years across different asset classes. The table below shows the holding period for long-term gains in various asset classes and the applicable tax rate:

#### \*Education Cess of 3% is applicable on all tax rates

As can be inferred from the data, equities enjoy zero taxability on long-term capital gains while in real estate or physical gold investment you have to pay a flat rate. "Due to these variations, the post-tax returns from these asset classes can vary substantially. There are provisions in income tax to reduce long-term capital gains (LTCG) through indexation or save LTCG tax by investing the gain in other alternatives," says Jitendra P.S. Solanki, a SEBI-registered investment adviser and founder, JS Financial Advisors.

Thus, apart from reducing your tax liability through the indexation benefit, the tax on long-term capital gains can also be saved by investing these gains in specified securities for a certain period of time.

Indexation Benefit: Inflation constantly erodes the real value of money through the rise in prices. Due to this even if your investments have risen four times during a particular period, the purchasing power of money might have went down by, say, 50% from the time of your investment. "To reduce the impact of inflation on your investment, indexation benefit is provided in calculating long-term capital gains. Through this benefit you can adjust your capital gains from inflation by applying an appropriate factor from cost inflation index to the original units," says Solanki.

Here is how indexation benefits works: Cost of purchasing a property in April 2007 - Rs 35,00,000 Cost of selling the property in May 2011 - Rs 50,00,000 Inflation Index- 2007-2008 - 551 2011-2012 - 785 Indexed Purchase Cost- 35,00,000 x 785/551= Rs 49,86,388 Long Term Capital Gains= 50,00,000-49,86,388 = Rs 13612\* Tax on LTCG= 13612 x 20%= Rs 2722 Education Cess= 2722 x 3% = Rs 82 Total Tax on LTCG = Rs 2804 \*The non-indexed gain would have been Rs 15 lakh

Thus, the indexation benefit reduces the tax liability substantially which otherwise would have been a huge payout for any investor.

2. Short-Term Capital Gains: Investment in any asset class, if held for a very short period, is taxed as short-term capital gains. Except equity, short-term gains from other assets are included in the investor's income and are taxed as per the slab rate. The data below highlights the taxation structure in case of short-term capital gains:

\*Education cess of 3% is applicable on all tax rates

This is how short-term capital gains are calculated: Cost of Equity Mutual Funds units bought in 2011 - Rs 100,000 Price of same units sold after 6 months - Rs 120,000 Short Term Capital Gains - Rs 20,000 Tax Applicable - 20,000 x 15%= Rs 3000 Education Cess - 3000 x 3%=Rs 90 Total Tax payable = Rs 3090

It is clear, thus, that with complex capital gains tax structure, it's wise to first make yourself aware of the net returns, i.e. post-tax returns, you will earn, whenever you intend to make any investment. This will help you in analyzing the amount of wealth you will create after paying your tax liabilities.

Re-collected from June - 2014

1. Calculate Min. Amt. Due for dues of credit card

Finance Charges - Applicable in the event of the card member deposits part of the Total Payment or the Minimum Amount Due. The amount attracts finance charges on entire outstanding including fresh purchases and other bank charges till the date of full and final payment.

Finance charges are calculated on a daily basis at the end of every day based on the current outstanding balance of the customer.

Illustration:

- Balance outstanding as on the statement date Rs.20000
- Balance is not paid on the due date.
- Interest 3.5% per month
- Daily Interest Charge for the above balance is
- = 20000 x (3.5% x 12 months)/365 = Rs.23.01
- Total interest payable by the next statement cycle (after 30 days)
- = Rs.23.01 x 30 = Rs.690.41 + Service Tax

(ii) Minimum Amount Due - Minimum Amount Due (MAd. is calculated by adding New Debits for the month, previously unpaid payments and other charges. Minimum amount also includes the amount by which the card holder exceeded the card limit.

Minimum Amount Due every month shall be higher of the following:

(a. 5% of the statement outstanding or

(b. Sum total of all installments billed, interest, fees, other charges, amount that is over limit and 1 % of the principal or

(c. Rs.250/-. In case of default or if the statement balance is less than Rs.250/-. the entire outstanding amount has to be paid.

Benefit of CRM : ?

An effective CRM implementation in retail banking will benefit the banks in more than way. The following are some of the important benefits that accrue to banks and enhance the customer focus of the banks:

(i) Improves the customer satisfaction and cross selling potential for the banks.

(ii) Helps the banks to derive increased share of wallet from the customer.

(iii) Enhances the operational efficiencies of the banks.

(iv) Helps to take on competition as CRM results in more customer focus and retention.

(v) Helps to understand Customer Lifetime Value through the structured data base on a dynamic basis.

(vi) Improves customer service through effective integration of all remote delivery channels.

(vii) Helps to manage multi delivery channels in a better way to adopt and maintain uniform service standards across channels.

(viii) Enables to achieve seamless information flow across functions in delivery.

(ix) Results in better relationship marketing as customer segments are better target based on the data available in CRM.

Role of Marketing Manager?

• Understanding the customer, his income level, his financial profile, his needs, his requirements of financial products and his life stage.

• Cross selling the right products to match their requirements.

• Post sales service follow up for customer satisfaction.

Credit card Weightage on amount owned?
